DISCRETE APPLIED MATHEMATICS

Author Index

Volume 65 (1996)

Arikati, S.R. and U.N. Peled, A polynomial algorithm for the parity path problem on perfectly orientable graphs (1–3) 5–20
Avis, D. and K. Fukuda, Reverse search for enumeration (1–3) 21–46
Bachem, A., W. Hochstättler and M. Malich, The simulated trading heuristic for solving vehicle routing problems (1–3) 47–72
Berge, C., Some properties of non-bicolorable hypergraphs and the four-color problem (1–3) 73–79
Błażewicz, J., M. Drozdowski, D. de Werra and J. Weglarz, Deadline scheduling of multiprocessor tasks (1–3) 81–95
Brucker, P., J. Hurink and F. Werner, Improving local search heuristics for some scheduling problems—I (1–3) 97–122
Burkard, R.E., R. Rudolf and G.J. Woeginger, Three-dimensional axial assignment problems with decomposable cost coefficients (1–3) 123–139
Carlier, J. and C. Lucet, A decomposition algorithm for network reliability evaluation (1–3) 141–156
Cochand, M. and A. Gaillard, On preemptive scheduling: a general setting for the two-phase method (1–3) 157–166
Dai, Y., H. Imai, K. Iwano, N. Katoh, K. Ohtsuka and N. Yoshimura, A new unifying heuristic algorithm for the undirected minimum cut problems using minimum range cut algorithms (1–3) 167–190
Dell' Amico, M. and F. Maffioli, On some multicriteria arborescence problems: complexity and algorithms (1–3) 191–206
de Werra, D., see J. Błażewicz (1–3) 81–95
Drozdowski, M., see J. Błażewicz, (1–3) 81–95
Euler, R. and H. Le Verge, Time-tables, polyhedra and the greedy algorithm (1–3) 207–221
Fukuda, K., see D. Avis (1–3) 21–46
Gaillard, A., see M. Cochand (1–3) 157–166
Glover, F., Ejection chains, reference structures and alternating path methods for traveling salesman problems (1–3) 223–253
Hammer, P.L. and A.K. Kelmans, Laplacian spectra and spanning trees of threshold graphs (1–3) 255–273
Hansen, P. and M. Zheng, Shortest shortest path trees of a network (1–3) 275–284
Hertz, A., Y. Mottet, and Y. Rochat, On a scheduling problem in a robotized analytical system (1–3) 285–318
Hertz, A. and M. Widmer, An improved tabu search approach for solving the job shop scheduling problem with tooling constraints (1–3) 319–345
Hilton, A.J.W., J.P. Liu and C. Zhao, Graphs that admit 3-to-1 or 2-to-1 maps onto the circle (1–3) 347–377
